

# How many types of 14500 battery cells are there

## Overview

---

The typical 14500 battery contains 600mAh to 1200mAh, but a 18650 may contain 2000mAh or 3. This offers a single 18650 the ability to have significantly longer runtimes and higher power output than 14500 batteries. They come in several types, each with different chemical compositions. Here are the most common types: Lithium-Ion (Li-ion): This is the most common type of. The 14500 battery is a rechargeable lithium battery, but its size and shape look like an AA battery. This is more than the voltage of regular AA batteries.
