

# How many watts of solar power does Chile generate

## Overview

---

Solar energy is Chile's largest growing source of renewable energy given the country's vast solar resources. In 2024 alone, solar power plants in Chile delivered 18.6 gigawatt hours (GWh) of energy, 3% of total national electricity grid generation, compared to less than 0. [1][2] In October 2015 Chile's. According to Coordinador Eléctrico Nacional (CEN) Chile's Independent System Operator, as of May 2025, Chile oversees a total installed power capacity of 37. This marks a trend of continued year-on-year growth in. In 2021, Chile produced 10. The country's National Heat and Cold Strategy aims for 80 “sustainable” energy use in household heating.
