

# How much does a 72 volt solar panel cost

## Overview

---

90 per watt without labor and other fees. Since your typical solar panel system size is 6.5 kW, anticipate spending around \$3,900 for the panels alone, or somewhere between \$1,950 and \$5,900. What's the difference between a 60-cell and 72-cell. They are more cost-effective than 60 cell solar panels. On average, a complete installation of such a system can cost between \$15,000 to \$30,000 for residential setups. As someone who's tested dozens of panels in various conditions, I can tell you that efficient energy conversion and durability matter most. If you work with a solar energy company, they can pick the right type of solar panel for you, but if you want to do it yourself, you may have even more options to choose from.
