

# How much does a European photovoltaic panel cost per watt

## Overview

---

For residential projects in Europe, fully installed pricing commonly lands around €1.70 per watt would total about €10,200 before incentives. The updated guide to photovoltaic module prices shows the latest costs of solar panels across Europe. According to the monthly index. Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) - Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market. Across much of Europe, a typical residential solar PV system often comes in around €8,000-€16,000 before any grants, VAT relief, or local support—depending on system size, roof complexity, and your country/region. 32 between Q1 2022 and Q4 2023 - that's faster than most analysts predicted," notes SolarPower Europe's latest market. Europe has quietly become one of the most competitive regions in the world for solar panel pricing.
