Overview

Plan on spending \$3 to \$7 per square foot on earthquake retrofitting your home. Hiring a general contractor costs 10% to 20% of your project total and ensures code compliance and safety. Permit fees range from \$500 to \$3,000, depending on your project's scope and your local. If you're planning a solar installation in seismic zones, you've probably noticed something frustrating: quotes for earthquake-resistant brackets range from \$80 to \$500 per unit. What explains this 525% price difference?

Let's break it down. In some cases, prices can range from as low as \$800 to as high as \$15,000. Check with a local pro for your specific job. Registration opens annually - apply early as funds limited. But hire pros for. How much does a complete residential earthquake retrofit cost?

My house has been through several earthquakes, particularly the 1989 Loma Prieta Earthquake, without damage. The cost to seismic retrofit varies based on a home's age, location, size, and foundation type.
