

How much does it cost to invest in energy storage solar in Georgia

Overview

Going solar in Georgia now averages about \$3. That means you can expect to pay roughly \$3,518.94 per kilowatt (kW) of installed capacity before incentives. For example, a 5 kW system typically costs around \$18,050.

Environmental benefits: Potential to reduce your carbon emissions significantly. That. For Georgia homeowners, the decision to go solar is supported by a solid combination of federal and state incentives that make the investment more affordable. While Georgia's incentive landscape is more streamlined than other states, the available programs can still significantly reduce your costs. Programs offer pilot tariff crediting for BTM DERs, DER colocation, and customer owned resources. After the tax credit, the price comes down to about \$9,423, which equals approximately \$2. Georgia's most accurate solar calculator.
