130kWh 60kW

Overview

A 6- to 10-kW solar panel installation costs \$12,600 to \$31,500 after the 30% federal tax credit. *Total cost may be lower with additional state and local incentives. Here we use the average yearly price for technologies 'Thin film a-Si/u-Si or Global Price Index (from Q4 2013)'. ranges between \$17,350 and \$38,000, depending on where. Total cost depends on everything from the type of panel to the size of the system to the complexity of the installation. Incentives also change from one state to another, shaping the final price dramatically. This 2026 guide breaks down the essentials so you can make a clear, confident decision. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. Today's premium monocrystalline solar panels typically cost between \$1 and \$1. This typically translates to about \$2.
