

# How to fix the photovoltaic panels in horizontal rows

## Overview

---

Use one of these formulas to find the best angle from the horizontal at which the panel should be tilted: If your latitude is below  $25^{\circ}$ , use the latitude times 0. Scroll to the bottom of any page to find a sun or moon icon to turn dark mode on or off! I have done quite a bit of reading and there seems to be some confusing information on the best way to install horizontal panels. I plan in installing 12x Longi LR66-495M modules horizontally. Should the rails. While the photovoltaic solar panel may be perfectly aligned to receive the sun's energy, it is a stationary object being fixed to either a roof or mounted directly onto a frame. The two most common orientations are: 1. Vertical (Portrait) Orientation: The longer side of the panel runs up and down.
