

# How to judge whether photovoltaic panels are dirty

## Overview

---

Studies have shown that dirty solar panels can lose anywhere from 10% to 25% of their energy output. Efficiency: Dirt, dust, bird droppings, and other debris can obstruct sunlight and reduce the panels'. How to tell if the solar panel is dirty?

To determine whether a solar panel is dirty, one must observe several indicators and perform specific assessments. Regular maintenance takes just an hour and requires minimal equipment, making it one of the most cost-effective ways to maximize your solar investment.
