

How to match solar inverters with solar panels

Overview

How to match a solar inverter with solar panels?

When it comes to solar inverter sizing, the basic idea is pairing the inverter's power rating measured in kilowatts with what the solar panels can actually produce. In fact, the inverter acts as the “brain” of your system—converting the DC electricity generated by solar panels into usable AC power for your home or business. I will be installing it in a few weeks, so hopefully I can get some tips here. The panels will be connected in series.
