

Huawei pack lithium battery latest

Overview

This new Huawei LUNA2000 10kWh+BMS Lithium Battery will allow up to 30kWh to be connected in parallel thanks to its 5kWh modular design in its different 5, 10 and 15kWh models. 5, 10 and 15kWh models parallelizable up to 30kWh - 10 year warranty. Huawei's patent application reveals that its battery uses a method of doping sulfide electrolytes with nitrogen to reduce side reactions at the lithium interface. Huawei has filed a patent detailing a sulfide-based solid-state battery design with energy densities between 180 and 225 Wh/lb, roughly. Among them is Huawei, which has patented a sulfide-based solid-state battery capable of delivering driving ranges of up to 3,000km and ultra-fast charging in just five minutes. Taking the battery-making industry by surprise, the fresh filing is for a solid-state. Huawei is the latest in a growing list of automakers and tech companies that are exploring the possible benefits of fitting an EV with solid-state batteries, with the likes of BMW, Mercedes-Benz, VW, BYD and Stellantis all publicly touting the tech. Electric car manufacturers have been seeking ways to increase range and discover the next big thing in the segment. Huawei might have found that, after filing a patent for a new solid-state.
