

Hungarian energy storage business

Overview

Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition. The new facility supports a growing push to green Hungary's power grid. Hungary has 40MWh of grid-scale BESS online today but that will jump 3,400% to around 1,300MWh over the next few years thanks to opex and capex support. The Hungarian government has earmarked HUF 62 billion (\$169 million) for grid-scale energy storage projects in a bid to facilitate further deployment of renewable energy sources. The winning bidders were selected a. Domestic support for energy storage may soon increase to more than HUF 300bn, with several large storage facilities likely to be inaugurated this year, Energy Minister Csaba Lantos said in an interview with business daily Világgazdaság. Lantos said through currently running applications, families.
