

Hungary s lowest power generation and energy storage project

Overview

Hungary's grid-scale battery buildout is moving into a more capital-intensive phase, with state-owned utility MVM committing roughly EUR 26 million to a 31 megawatt battery energy storage system at its Tiszaújváros site. Hungary has officially announced a large-scale residential battery energy storage subsidy program, signaling a major acceleration of energy storage deployment across Central and Eastern Europe. With a total budget of HUF 100 billion (approx. The project, sized at 62 megawatt-hours, reflects a growing recognition that. Hungary remains a net electricity importer (historically ~30% of consumption), with domestic generation dominated by nuclear and growing solar.
