

Hybrid type of energy storage battery cabinet for French construction sites

Overview

PowerLink Hybrid Energy meets modern construction site needs: tighter emission regulations, high instantaneous power demands and slow EV charging rollout. In France, these spikes can lead to costly grid. ZE Energy has secured funding to expand its hybrid solar and battery storage projects across Europe, enhancing stability and sustainability in renewable energy. Each LiHub cabinet integrates inverter modules, high-capacity lithium battery modules, a cloud-based EMS (Energy Management System), fire. Multi-dimensional use, stronger compatibility, meeting multi-dimensional production and life applications High integration, modular design, and single/multi-cabinet expansion Zero capacity loss, 10 times faster multi-cabinet response, and innovative group control technology Meet various industrial.
