

# Insufficient solar energy charging on site

## Overview

---

Insufficient capacity happens when solar panels do not generate enough energy for battery charging. System faults can involve wiring problems or inverter failures. Resolving these issues can improve the performance of the. Why is solar panel charging not enough?

Solar panel charging often falls short due to several factors that limit its efficiency and effectiveness in meeting energy demands. Dust, dirt, or even bird droppings can reduce the efficiency of the panel. Incorrect Connection of Series/Parallel Panels: If the panels are incorrectly connected in series or parallel, this can cause inefficient charging or low power.

### Home Energy Storage (Stackble system)

**Product Introduction**

- 1 Scalable from 10 kWh to 50 kWh
- 2 Self-Consumption Optimization
- 3 Integrated with inverter to avoid the compatibility problem
- 4 LFP battery, safest and long cycle life
- 5 Stackble design, effortless installation
- 6 Capable of High-Powered Emergency-Backup and Off-Grid Function
