

Intelligent Power Cabinets for Substations in the UAE Region

Overview

Ingeteam offers a wide range of products and solutions with the latest technology for the comprehensive control, protection and automation of electrical substations. Welcome to IGC (Intelligent Globe Construction)—your one-stop solution for smart infrastructure, sustainable energy systems, and seamless engineering services across the UAE and beyond. With deep roots in electrical contracting, MEP, mechanical services, and civil construction, we don't just. eHouses are prefabricated modular substations with integrated lighting, HVAC, Fire & Gas Systems and mechanical systems which house medium and low voltage switchgear, critical power equipment and automation cabinets. The advantages include the possibility of monitoring and remote control. In the first step, grid operators can use WAGO technology to precisely identify where their infrastructure must be modernized. Based on the latest IEC 61850 and cybersecurity standards, our solutions combine improved. Based on advanced technologies such as video surveillance, AI, fiber vibration sensing, and wireless communication, Huawei's intelligent substation solution enhances data exchange and intelligent analysis capabilities to realize more intelligent substation production management.

Intelligent Power Cabinets for Substations in the UAE Region

Intelligent Group - LLC

Manufacturer and systems integrator of SCADA, control, protection, and automation panels, specializing in real-time grid control, substation communication, and smart utility systems.
