

Irish Carbon Battery Energy Storage System

Overview

SSE has acquired the project development rights for a 120MW/240MWh grid-scale battery energy storage system (BESS) project in Ireland's Midlands from UK-based renewable energy company Low Carbon which, if approved for final delivery, could be constructed and operational by the end. SSE has acquired the project development rights for a 120MW/240MWh grid-scale battery energy storage system (BESS) project in Ireland's Midlands from UK-based renewable energy company Low Carbon which, if approved for final delivery, could be constructed and operational by the end. SSE's 50MW battery storage asset at Salisbury in Wiltshire, England, which entered commercial operation in April 2024. Picture credit: SSE Renewables. Pictured is the company's 50MW battery storage facility in Wiltshire, England. The Thornsberry grid-scale project near Tullamore could power over 115,000 Irish homes for up to two hours at a time. If approved for final delivery, the company. The Kylemore Battery Energy Storage System in Dublin went into operation in 2023 and has the capability of providing 30MW of fast-acting storage.

Irish Carbon Battery Energy Storage System

Battery Storage

We are at the forefront of developing battery systems, supporting the decarbonisation of Ireland's electricity system. We currently have more than 300MWs of battery storage capacity in operation in ...
