

# Is energy storage considered new energy equipment manufacturing

## Overview

---

Energy storage batteries are manufactured devices that accept, store, and discharge electrical energy using chemical reactions within the device and that can be recharged to full capacity multiple times throughout their usable life. Domestic suppliers - AMMTO strengthens domestic material supply chains and improves manufacturing capabilities for energy storage technologies. By 2027, China aims to cultivate th and cost-effective energy.

## Is energy storage considered new energy equipment manufacturing
