

# Is solar power the only power source at home

## Overview

---

The short answer is: yes—it's possible, but it depends on your home's energy needs, the size of your solar array, and how you manage your electricity usage. For many households, going fully solar requires careful planning, efficiency upgrades, and sometimes additional equipment. It is definitely possible to power a house completely with solar energy. In this post, let's examine whether a home can be. Solar projects are making it easier for Americans to choose solar energy to power their homes. 7 MIN READ • Last updated: 1. How many solar panels do I need to power my home?

2. Factors like system size, energy consumption, and panel efficiency all play a role in determining just how much solar can do for you.
