

Juba solar power generation system

System Layout

Overview

The solar farm is under development by a consortium comprising Elsewedy Electric Company of Egypt, Asunim Solar from the United Arab Emirates (UAE) and I-kWh Company, an energy consultancy firm also based in the UAE. The solar farm will have an attached battery energy storage. The Juba Solar Power Station is a proposed 20 MW (27,000 hp) solar power plant in South Sudan. This project was entirely self-funded by Ezra Construction Company. Since 2011, Aptech Africa has had a steadfast presence in South Sudan and has consistently been the preferred EPC. Renewable energy EPC firm, Aptech Africa, has announced the completion of 26 MWp of solar panels on the Ezra Power Plant in Juba, serving to enhance energy security and diversification in the nation's capital city. The capital of South Sudan is set to host a new 1 2 MWpgrid-connected solar plant.

Juba solar power generation system

Juba Embraces Solar Photovoltaic Panels: Sustainable Energy Solutions

As Juba's solar photovoltaic panel adoption accelerates, both homeowners and businesses gain access to reliable, cost-effective energy solutions. With proper implementation, South Sudan can build a sustainable ...
