

July Exhibition New Energy Storage

Overview

We are excited to announce the upcoming India Energy Storage Week (IESW), a premier international conference and exhibition set to take place from July 8th to 10th, 2025, at IICC Yashobhoomi, New Delhi, India, with a dedicated tech tour on July 11th. The renewable energy sector is poised for major growth, with installed capacity expected to climb from 507.4 GW by 2030, an anticipated CAGR of 7%. As solar, wind, energy-storage, and grid-modernisation technologies move from niche to mainstream, the ecosystem is maturing. This February 18-20 at the San Diego Convention Center, IESNA Flagship will provide activities that enhance education, collaboration, and connection beyond the exhibit hall and conference program. “Programming for IESNA Flagship—the first major solar and storage event of 2026—provides professionals, engineers, and entrepreneurs in a vibrant, high-energy environment. That’s the July Energy Storage Exhibition in a nutshell – the Coachella for energy nerds. But instead of flower crowns, we’ve got solid-state battery prototypes that could power your smartphone for a week. In 2020, the Ministry of Education, the National Development and Reform Commission, and the National Energy Administration jointly issued the "Action Plan for the Development of Energy Storage Technology Disciplines (2020-2024)", accelerating the cultivation of "high-precision and cutting-edge". Returning in 2026 for its 13th edition, Solar Finance & Investment Europe Summit will bring together the brightest minds representing funds, banks, developers, utilities, government and industry across Europe and the UK on a programme that is solutions-focused from top to tail. The event is. As the energy storage and lithium battery industry enters the stage of large-scale production and delivery, how energy storage and lithium battery manufacturers can improve warehouse turnover efficiency, strengthen production site management through intelligent information systems, especially.
