

Kigali battery energy storage production enterprise

Overview

Specializing in renewable energy storage solutions, we serve multiple sectors including utility-scale solar farms, microgrid developers, and industrial complexes. Our 25,000m² facility integrates R&D, production, and testing under one roof. Rwanda's ambitious vision to achieve 60% renewable energy by 2030 hinges on one critical component: Kigali energy storage battery supply. Our primary audience includes: Government agencies implementing national electrification programs Solar and wind farm developers across East Africa. In 2022, EK SOLAR deployed a 500 kWh BMS-powered storage system for a lakeside resort. Results?

The Kigali Energy Storage BMS System is more than hardware—it's a catalyst for Rwanda's energy independence.
