

# Kigali power system energy storage status

## Overview

---

Recent reports confirm that the Kigali Energy Storage Project has achieved 85% completion, with phase one expected to go live by Q3 2024. Key milestones include: "This project isn't just about storing energy—it's about powering Rwanda's future. " - Ministry of Infrastructure. With 65% of Rwanda's electricity now coming from renewables (National Energy Policy 2023), managing supply fluctuations has become critical. The Kigali facility's 50 MW/100 MWh battery storage system addresses three key challenges: "Storage isn't just about batteries—it's about building energy. The Kigali Energy Storage Project continues to make headlines as a transformative initiative in Africa's renewable energy landscape. Here's the kicker: during peak production, excess energy converts water into hydrogen through electrolysis. When demand spikes or generation drops, hydrogen fuel cells kick. ng 300MW of pumped storage and 750MW of flexible hydro. Topics will concentrate on raw materials.
