

Lack of talent in wind and photovoltaic power generation

Overview

As demand for renewable energy rises, the development of new infrastructure as well as the revitalization of existing assets will require a substantial influx of labor. This. The renewable energy sector, despite market growth, faces a significant talent gap across both white-collar and blue-collar positions that threatens its continued expansion. The labor shortage is exacerbated by a lack of awareness regarding career paths in clean energy and a departure of. But just as demand for electricity skyrockets, a shortage in talent now threatens to derail the energy sector. According to a recent joint study by consulting firm Kearney and IEEE, the global power sector will need between 450,000 and 1.
