

Lead blocks on solar power stations

Overview

Lead-acid batteries have been used for many years as a reliable and cost-effective energy storage solution for solar power systems. The answer to the question, “Can you use a lead-acid battery for solar?

” is a resounding yes. This fact sheet provides an overview of battery basics, including information to help you. Forget buying an over priced power station like a Jackery, Goal Zero, or other pre-built solar battery bank for your outdoor adventures. Read Low-tech Magazine offline.
