

Leading stocks in solar glass power generation

Overview

In this article, we cover nine of the best solar stocks to buy in 2025, all listed on major U.S. exchanges. We aim to give you a clear, beginner-friendly view of each company, why it qualifies, and what the risks are. The solar energy industry builds and installs devices to capture energy from the sun and convert it into electric power. Currently, less than 4% of all U.S. power generation comes from solar, so there's plenty of room for growth in the years ahead. This makes it a key solution for fighting climate change. With the levelized cost of energy for utility-scale solar down around \$30 to \$60 per megawatt-hour, solar remains one of the least expensive energy sources. Global X Solar ETF (RAYS) and Invesco Solar.
