

Lithium solar container battery Unit

Overview

A containerized energy storage system (often referred to as BESS container or battery storage container) is a modular unit that houses lithium-ion batteries and related energy management components, all within a robust and portable shipping container. LFP cells: High quality and long cycle life LFP battery cells; BMS: High-efficiency bidirectional equalization technology eliminates series connection losses; PCS: IP65 PCS, highly efficient IGBT, as high as 99.3%; Distribution system: Integrate AC/DC power distribution and AC output. Two-stage. Since 2023, the lithium carbonate and silicon material prices have decreased, the battery pack and battery component prices have decreased too, and the shipping container battery storage system prices fell sharply, the large-scale storage battery does not mean high cost, the parity comes!. The EnerC+ container is a modular integrated product with rechargeable lithium-ion batteries. It offers high energy density, long service life, and efficient energy release for over 2 hours. Individual pricing for large scale projects and wholesale demands is available.

Lithium solar container battery Unit

2MW Lithium ion BESS Container

The battery energy storage system container has a long cycle life of over 6000 to 8000 times, with large capacity lithium-ion phosphate battery cells in battery packs, connections in clusters, and the whole ...
