

Longi Green Energy photovoltaic panel price reduction

Overview

On October 29, market rumors were swirling that LONGi Green Energy would increase the prices of its photovoltaic modules by 1 to 2 cents per watt. 4 billion) for the first half after product prices plunged as a result of oversupply. Longi was the only one of the five companies to narrow its loss in the. Longi Green Energy Technology Co. will begin substituting base metals for silver in its solar cells, the latest move by the industry to mitigate the surging cost of the precious metal. This comes despite narrowing losses compared to 2023's bleak figures, revealing unrelenting systemic pressure. At the key node of intergenerational transition of global Photovoltaic (PV) technology, the back contact (BC) cell technology is leading the new-generation PV technology paradigm revolution, becoming the core engine to drive industry cost reduction and efficiency improvement and realize energy. (Bloomberg) -- Longi Green Energy Technology Co. The loss is within the range flagged by the world's top producer of solar. China's solar sector faces turbulence due to the planned removal of a key export-tax rebate, which could disrupt demand patterns.
