

Lusaka solar grid-connected system

Overview

Zambia inaugurated a 20 MW solar photovoltaic plant in Lusaka to diversify its power mix amid climate-driven hydropower constraints. Kiyona Energy, a ZESCO subsidiary, developed the project and will allocate 2 MW directly to the Natural Resources Development College. The Project, which is being developed by ZESCO Limited, through its. It has implemented two utility-scale solar power plants (54 megawatts and 34 megawatts) in Lusaka south multi-facility economic zone under the World Bank Scaling Solar initiative.

However, about half of the Zambian population lives in rural areas most of which do not have access to the utility. Lusaka, Zambia - 5 February 2026 (ECA) - The United Nations Economic Commission for Africa (ECA) today held a Contract Close-Out Session marking the successful completion of a pioneering hybrid photovoltaic (PV) solar system at its Sub-Regional Office for Southern Africa (SRO-SA) in Lusaka, Zambia. GreenCo will onward supply the energy to First Quantum Minerals (FQM), Zambia's largest mining investor, under a separate Power Supply Agreement (PSA)—delivering firm power to be achieved without sovereign guarantees or government. Image: Kiyona Energy Limited, a subsidiary of ZESCO broke ground for the 20MW solar project on 29 January.
