

# Luxembourg Energy Saving New Energy Storage Field

## Overview

---

As Luxembourg City accelerates its transition to renewable energy, the 100MW storage project acts like a giant "power insurance policy" for the grid. Think of it as a massive battery that: Luxembourg's solar generation varies dramatically - sunny days produce 300% more energy than. Why a dedicated strategy for battery storage?

Thank you! THANK YOU! value. With a 20-point roadmap to scale electricity storage, the Grand Duchy is opening doors for innovation in grid flexibility, home energy systems, and smart infrastructure. The strategy, announced on 9 July, aims to maximise the added value of storage batteries for end consumers and the electricity. On Wednesday 9 July 2025, Luxembourg's Minister of the Economy, SMEs, Energy and Tourism, Lex Delles, presented the strategic roadmap for the promotion and development of electricity storage batteries in Luxembourg: "Späicherstrategie Lëtzebuerg". Submitted to the European Commission, this roadmap aims to reduce greenhouse gas emissions by 55%, increase renewable energy sources to 25% of the energy mix, and solution; Masdar | Energy Storage. The city's unique challenges - limited land area combined with growing EV adoption (projected 45% market penetration by 2027) - make traditional grid upgrades impractical.
