

Maldives New Energy solar Inverter

Overview

The project involves constructing two solar power plants near N'Djamena, each capable of generating 15 megawatts peak electricity. We are dedicated to providing our customers with the highest quality products and services, and to helping the Maldives transition to a more sustainable energy future. As part of the landmark POISED project, this initiative is set to save 1.2 million liters of diesel annually and slash carbon emissions by 3,300. In 2022, the Maldives was crowned the 'World's Leading Destination', for the third consecutive year, at the World Travel Awards. With a population of around 550,000, the Maldives comprises 185 islands. This USD 200 million opportunity enables investors to deploy 100MW of household solar systems across the Maldives, creating the region's most extensive. Fenaka, in partnership with the Ministry of Climate Change, Environment and Energy, has officially launched the Magey Solar program, an ambitious initiative aimed at harnessing solar energy by installing photovoltaic (PV) systems on the rooftops of private homes across the Maldives.

Maldives New Energy solar Inverter

Why the Maldives 5 MW solar project is a game changer

Moving from a fossil-based to a renewable-based energy model is the best way to make electricity cheaper for everyone, reduce the fiscal risks, and protect this pristine island paradise.
