

# Mandatory photovoltaic energy storage

## Overview

---

All nonresidential buildings with solar PV systems are required to have a battery energy storage system unless they meet an exception. These requirements apply to buildings where at least 80 percent of the total floor area (conditioned or not) serves one or. The 2025 code cycle of Title 24, also known as California Building Standards Code, will be effective beginning Janu. This technical bulletin provides an update on solar and storage installation compliance requirements in Part 6, California Energy Code, as well as CSU-specific reporting. Updates effective Janu, expanded the scope of these requirements, emphasizing solar photovoltaic (PV) systems and energy storage capabilities. Compliance with Title 24 ensures that new homes and businesses reduce their reliance on conventional power sources. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory report. This amount represents an almost 30% increase from 2024 when 48. 6 GW of capacity was installed, the largest.

## Mandatory photovoltaic energy storage

---

### Energy Storage Systems (ESS) and Solar Safety

NFPA is keeping pace with the surge in energy storage and solar technology by undertaking initiatives including training, standards development, and research so that various stakeholders can safely embrace renewable ...
