

# Micro Solar Lighting System

## Lithium battery parameters

Product capacity: 100Ah

Product size: 135\*197\*35mm

Product weight: 1.82kg 197mm  
/7.7in

Product voltage: 3.2V

internal resistance: within 0.5

## Overview

---

It consists of small-scale solar panels, rechargeable batteries, LED lights, and sometimes additional features like USB ports for charging devices. These systems are designed to provide illumination in off-grid or remote areas where access to electricity is limited or unreliable. Micro-grids improve reliability and resilience of neighborhoods plants and districts and can increase the resilience, efficiency, better manage electricity supply and demand, and help integrate renewables, creating real chances to cut greenhouse gas emissions and reduce dependence on fossil fuels. The ClimatePartner certified product label confirms that a product meets the requirements for the five steps in climate action including calculating carbon footprints, setting reduction targets, implementing reductions, financing climate projects and communicating transparently to continuously. Modern LED fixtures achieve exceptional efficiency of 100+ lumens per watt, with premium units exceeding 200 lm/W and lasting 50,000+ hours. Proper system sizing is critical for reliable winter. Micro solar panels are revolutionizing how we power our everyday devices, from backyard lighting to portable electronics. Studied and customized for each project. Minimumu Maintenance: No painting, Plug & Play, Ultralight and without tools.
