

# Million-kilowatt wind power grid-connected power generation

✓ 100KWH/215KWH

✓ LIQUID/AIR COOLING

✓ IP54/IP55

✓ BATTERY 6000 CYCLES

## Overview

---

So far, China's newly added grid-connected wind power generation capacity has exceeded 57. SASAC The world's first 20-megawatt (MW) wind turbine, which is capable of powering more than 44,000 times a year, has. China's installed wind power generation capacity has consistently ranked first in the world for an impressive 15-year streak, according to the latest data released by the China Electricity Council on Sunday. 7, 2025 /PRNewswire/ -- On February 6th, seven new energy projects, including Guangdong Energy's 500,000-kilowatt wind power project in Toksun, received approval for grid connection. This marks China's first offshore installation, commissioning and grid.
