Overview

This chapter examines the factors driving Uruguay's recent adoption of renewable energy sources and explores the balance between public and private ownership within its energy landscape. As the country transitions to the second stage of decarbonization of its energy matrix and looks to increase energy exports, there will be new opportunities for companies that can provide solutions. With no fossil fuel reserves to rely on and domestic demand rising, the country had to get creative—or go broke just trying to keep the lights on. for the construction, operation and maintenance of two solar photovoltaic energy plants in Uruguay. The ceremony took place in Montevideo with IIC CEO James P.

Montevideo solar energy research and development

Solar energy market monteideo

The Natelu solar plant was built near Mercedes, in the Uruguayan department of Soriano. The project was financed by the Inter-American Development Bank (IDB) and the Canadian Climate Fund (C2F).
