

My country s solar photovoltaic power generation news

Overview

The community solar segment installed 1,745 MWdc in 2024, marking its largest-ever year of capacity and a remarkable 35% increase over 2023. This growth was driven by record-breaking capacity additions in New York, Maine, and Illinois. By the end of 2023, photovoltaic solar arrays provided an estimated 6.5% to 7% of the world's electricity, marking a continued rise in its contribution to global energy generation. Renewable energy not making a difference?

Think again ABC News Chief Meteorologist Ginger Zee explains the impact that renewable forms of energy are having on the environment. On this page you'll find resources to.
