

Myanmar solar panel exports surge

Overview

Chinese exports to Myanmar more than doubled to \$100 million this year and are up eightfold compared to pre-pandemic levels. Shops, clinics, schools, restaurants, and even ice-cream sellers now rely on small solar systems to power lighting, refrigeration, and electronic. When Thailand cut power supply to Myanmar across its western border this year, it intended to curb online scam centres linked to regional networks trafficking hundreds of thousands of people. Chronic blackouts, collapsing infrastructure, and a government crippled by sanctions. In the midst of an ongoing civil war and economic collapse, Myanmar stands at a critical juncture where energy scarcity has ignited an unexpected market boom in solar power, providing a lifeline for millions enduring persistent blackouts. This shift is driven less by climate goals and more by stark necessity. The country's traditional reliance on. Myanmar is experiencing a significant shift towards solar energy, driven by a severe power crisis exacerbated by the ongoing civil war and Western sanctions. The country's electricity supply has deteriorated since the 2021 military coup, leading to widespread blackouts and impacting essential.
