

# New energy storage project in Skopje

## Overview

---

New independent energy storage project in Skopje. By the year 2024, Ai Stratis will become the first energy-independent island thanks to an innovative electricity production and storage. North Macedonia's capital just made history. A city where sudden power outages become as rare as unicorn sightings, and solar panels work overtime even after sunset. The \$5 billion. Operational since Q2 2024, this €1. But here's the kicker - it's achieving 82% round-trip efficiency, outperforming even the Swiss Nant de Drance facility's 80% benchmark [8]. North Macedonia's solar. The Skopje phase change energy storage project aims to fix this energy storage dilemma through thermal banking technology that's 40% more efficient than lithium-ion batteries. The rated storage capacity of the project is 600,000kWh. GEN-I Skopje, a subsidiary of Slovenia-based GEN-I, won the right to build it in 2019, at a tender for a 50-year lease of state-owned land.
