

# North Korea makes inverter and grid-connected equipment for communication base stations

## Overview

---

North Korea has begun to import second-hand Huawei equipment as part of plans to upgrade its existing mobile networks. As reported by Daily NK, Huawei equipment will be used to upgrade 3G base transceiver stations (BTS) in major cities such as Pyongyang, Nampo, Pyongsong, Sariwon. North Korea has recently begun importing second-hand telecommunications devices from China to replace existing base transceiver station equipment in several major cities, Daily NK has learned. Speaking on condition of anonymity due to security reasons, a Daily NK source in North Korea said Monday. Korea is taking concrete steps to assess the potential security risks posed by China-made inverters, key in solar panels and batteries, following the launch of a probe into the devices in the United States after some unexplained communication components were found inside. Within the central government, solar has been most widely adopted by the financial and telecommunications sectors. Internet in South Korea is more robust and developed than in almost any other country, with gigabit wired service being.
