

# Norway energy storage policy

*LiFePO<sub>4</sub> Battery, safety*

*Wide temperature: -20~55°C*

*Modular design, easy to expand*

*The heating function is optional*

*Intelligent BMS*

*Cycle Life: ≥ 6000*

*Warranty: 10 years*

## Overview

---

Norway's hydropower pumped storage capacities, amounting to 83 TWh, are increasingly being leveraged to regulate renewable energy surpluses in Europe and stabilize electricity prices. The aim of Norwegian energy policy is to provide a suitable framework for maintaining an efficient, climate-friendly and reliable energy supply system. Following expansion, cooling demand was calculated to increase to 19MW according to an unpublished COWI report. This has been covered by a new 4MW cooling-effect heat nance carbon capture and storage (CCS). The project is set to recei energy storage in China. Norway is at the forefront of energy storage innovation, leveraging its rich hydropower heritage and cutting-edge technologies.
