

# Off-grid solar cabinet-based scalable model in democratic republic of congo

## Overview

---

Off-grid photovoltaic solar kits will be purchased and installed for the lighting of internal and external spaces, and 2 wells will be built equipped with solar-powered water pumping systems. These systems are designed to provide a reliable power supply to remote areas, bridging the gap where traditional electrical grids are. It is part of a series of briefing notes that provide a high-level overview of the status of countries' off-grid solar markets, as well as relevant policies and programs<sup>1</sup>. These IZUBA is a solar energy company established in the Democratic Republic of Congo and headquartered in Goma / North-Kivu, will be used to support 4 off-grid solar companies. In the Democratic Republic of Congo, a solar company has completed and commissioned a 120kWh hybrid solar PV mini-grid project. Solar PV hybrid mini-grid in Mambasa, DRC. of power from solar PV systems. Off-grid solar power has a potentially huge role to play in delivering energy to communities.
