

Overseas New Energy Storage Sales

Overview

In 2024, frequent policy shifts and record-breaking tenders have made expanding overseas a top priority for manufacturers. According to InfoLink's statistics, non-China markets' energy storage cell shipments reached 137.3 GWh, with the top five suppliers being CATL, BYD, EVE. Since 2024, gigawatt-hour projects have been commissioned or started construction in not only the US and China, but also Saudi Arabia, South Africa, Australia, Netherlands, Chile, Canada and the UK. BloombergNEF expects additions to grow 35% this year, setting a record for annual additions, at 94. Recently, several international companies, including Solaredge, Enphase, Tesla, and Fluence, have released their semi-annual reports for the year 2023. Notably, these reports collectively highlight the sustained growth in the overseas energy storage sector during the first half of the year, with. Our Annual Global Energy Storage market report adds to our continued series of key energy transition focused industry reports. 4 GWh of installed capacity in 2024, with the three major regional markets—China, the Americas, and Europe—continuing to account for over 90% of global installations.
