

Photovoltaic Panel Land Lease 2025

Overview

The short answer is, “it depends,” but solar lease rates (also called “rents”) typically range from about \$450 to \$2,500 per acre, per year—though can go much, much higher. This article looks at the factors that influence the rates a solar developer may offer for your land. The solar energy market across the United States is surging in 2025. But the decision isn't just about taking the first offer—it comes. Landowners are increasingly approached by developers for solar energy leases, a trend bolstered by favorable government policies toward renewable energy. Solar leases involve long-term commitments, often spanning 50 years or more, necessitating thorough due diligence by landowners before signing.
