

# Photovoltaic bracket through hole mold

## Overview

---

The Photovoltaic/PV Bracket Roll Former (strut channel roll forming line) is specifically designed to produce C-shaped brackets with pre-punched holes, widely used in photovoltaic support systems. One-click start, intelligent manufacturing for the future—JUGAO PV bracket fully automated molding production line, your core equipment for profitability!. Carlon PV-Mold is a nonmetallic pole riser system designed to protect communications power cable installed on poles. The Photovoltaic/PV Bracket Roll Former efficiently manufactures various rack profiles by utilizing. The utility model provides a flexible photovoltaic bracket, which comprises at least two bracket bodies, wherein steel beams are longitudinally arranged on the bracket bodies, a plurality of connecting plates are vertically arranged on the side surfaces of the steel beams at intervals along the. Therefore, CHIKO offers customized PV bracket design services that determine the optimal installation angle and direction through precise calculations and simulations to (specialist brackets available for Shingle & Roman).
