

# Photovoltaic new snow shield

IP65/IP55 OUTDOOR CABINET

ALUMINUM

OUTDOOR ENERGY STORAGE CABINET

OUTDOOR EQUIPMENT CABINET

## Overview

---

These snow guards catch sliding snow, preventing it from falling all at once. They're easy to install with screw-on clamps. When selecting your PV panels, you should discuss snow guard options with your provider to safely. Solar energy can be collected in both sunny and not so sunny conditions—but what happens when it snows?

Believe it or not, your solar panels will still collect energy on a snowy day, but if heavy snow builds upon those panels, they'll not only be blocked from doing their job, they can also become. Snow guards are barriers installed between or on the edges of solar panels to hold or break up snow before it slides off the roof. You should consider installing snow guards if;. The smooth surface of solar panels coupled with the equally smooth surface of a standing seam metal roof can result in a very sudden slide of snow in quantities large enough to cause severe damage to anything or anyone below. One of the most economical ways to prevent a snow “avalanche” is to. Snow guards are specialized devices designed to prevent snow and ice buildup on sloped surfaces, including roofs supporting solar panels. Installing rooftop PV panels can lead to significant savings on your electric bill. Photovoltaic snow shields have become essential protection for solar arrays in northern climates, with modern solutions ranging from simple \$20 manual scrapers.
