

Photovoltaic panel completion data list

Overview

Open PV Project: This dataset provides information on the installed photovoltaic (PV) systems in the United States. The data can be downloaded from the United States Large-Scale Solar Photovoltaic Database (USPVDB) which provides the locations and array boundaries of U.S. photovoltaic (PV) facilities with capacity of 1 megawatt or more. The data is collected by NREL. Roof has 10 or more years useful life remaining (if roof-mounted). Solar installers, system integrators, and sellers can use our advanced technical filters to find the exact PV panels that match their needs. View all of NREL's solar-related data and tools, including more PV-related resources, or a selected PV Performance.

Photovoltaic panel completion data list

Major Solar Projects List

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is updated monthly.
