

# Photovoltaic panel construction pad

## Overview

---

The secret often lies in photovoltaic panel spacing pads - those unassuming rubber or polymer components that literally hold your solar investment together. These little marvels prevent panels from rubbing against each other, maintain airflow, and protect against structural stress. Precast concrete ballast footing used to securely position solar panels and related mounting hardware and help prevent movement and overturning of solar panel systems. Whether you're looking for additional product information or design assistance, or you're ready to get a personalized quote, our. Do you need to hold down ground mounted solar panels?

Conigliaro Block manufactures all types of precast concrete solar ballast blocks used to securely mount and position solar panels. Cable Tray Support Ballast Blocks that are typically 2' X 2' X 1.5' high or 2' X 2' X 2' cubes and Fence Ballast. Allation by Solar Foundations USA®, Inc. This tower is available in two configurations: – A temporary, guyed configuration for pre-construction Solar Resource Assessment (SRA).
