

Photovoltaic panel hoisting square

Overview

Here you'll find solar panel hoists for lifting modules to the roof, ladder stabilizers and clamps to keep your access safe and solid, steep roof and roof access tools, helmets, tool leashes, and other gear designed to keep people and equipment where they belong. The Fluke Module Lift™ is designed to safely and quickly transport a PV module to a roof, streamlining the installation process of solar panels. The device uses your existing fiberglass Werner or Louisville extension ladder. The hoisting process directly impacts safety, project timelines, and long-term system performance. With global solar installations expected to reach 350 GW annually by 2025 (IEA 2023 data), contractors need. RGC's Platform Hoists and Swing Hoists are essential tools for solar panel installations, offering safe and efficient solutions for transporting heavy and bulky materials to rooftops and elevated areas.
