

# Photovoltaic panel line direction

## Overview

---

In most cases, the best direction for solar panels is facing south 1. Arrays that are appropriately oriented can improve energy output by up to 30% or more 2. However, factors such as roof slope and proximity to the equator may have some homeowners considering other directions. Whether you're planning a new installation or optimizing an existing system, understanding solar panel direction and orientation is crucial for maximizing your system's efficiency in 2025. This article discusses the following: Why do solar panel orientation and angle matter?

How to calculate the best orientation and angle?

Why Do Solar Panel. South-facing solar panels are the best direction for maximum energy production in North America, generating up to 30% more electricity than other orientations. West-facing panels work better for Time-of-Use rate plans, while east-facing options suit morning energy needs. In this guide, we'll break down.

### What's the Best Angle for Solar Panels? , EnergySage

South-facing solar panel systems almost always generate the most electricity, but east-west roofs can work well for solar, too. The direction is more important than the angle. Angle is rarely a make-or-break ...

### The Ultimate Guide to Solar Panel Orientation and Efficiency

For the vast majority of homeowners in the Northern Hemisphere (including the United States and Europe), the optimal direction is true south. It's important to distinguish this from magnetic south, as true south aligns ...

## How to Find the Best Orientation and Angle of Solar Panels?

Prioritizing solar panel direction over angle is recommended. While achieving the optimal tilt can enhance output by approximately 5-8%, orienting the system southward can increase efficiency by up to 30% or more.

## Solar Panel Orientation and Positioning for Best Angle

A solar panel or solar array will capture more energy if it is facing directly at the sun, perpendicular to the straight line between the position of the panels installation and the sun.
