

Photovoltaic panel operator job description

Overview

Monitor and operate solar power generation equipment, including PV panels, inverters, batteries, tracking systems, and monitoring devices. Perform routine inspections of solar arrays to identify any damage, soiling, or shading that may affect energy production and take. Solar power plant operators operate and maintain equipment which produce electrical energy from solar power. They also react to system problems, and repair faults. Most solar panel installations are done outdoors, but PV installers sometimes work in attics and crawl spaces to connect panels to the electrical grid.
